Mines and Prospects--Furnaces and Mills

MUCH ACTIVITY

Many Prospectors Are Going In.

Miners Are Confident That Western Pacific Will Aid.

Region Is One That Is Very Rich in Silver and Copper

Renewed and unusual activity in the Deep Creek region, Clifton region, is reported by W. B. Richards, a mining man of long experience in that section, who has just arrived from camp after completing arrangements for the opening of the season's campaign on several properties owned by himself and associates.

erties owned by himself and associates.

Mr. Richards states that while coming in he met no less than ten complete and well-equipped prospectors' outfits, all headed for the Clifton district and manifesting the greatest confidence in the bright future of the camp.

Virtually every piece of ground whose gurface showing gives the slightest indication of mineral values has been located, according to Mr. Richards's observations, and he feels certain that a greater amount of work will be done this season than any two previous years have witnessed.

son than any two previous years have witnessed.

While the richness of this section of the Deep Creek country has long been recognized by prospectors and mining men. Mr. Richards believes that the great amount of interest at present manifest in the section is due to the fact that the now practically assured construction of the Western Pacific road renders it certain that the long and expensive haul, both of product and supplies, will soon be abolished, with the result that scores of properties whose ores, though valuable, will not stand the present cost of transportation, can be worked at a good profit.

profit.

The line of survey for the new Gould road from San Francisco to Salt Lake passes within thirty miles of Clifton, and even should no branch be constructed to give direct communication with the mines, the building of the main line will afford opportunity for the shipment of coke at low cost and the construction of smelters to handle the ores.

That this entire region is rich in copper and silver there is no doubt, and the securing of adequate facilities will certainly give it a boom.

LOOKS LIKE BLACKMAIL.

Suit Against Kimberly Estate Seems Unwarranted by Facts.

That the \$2,000,000 suit filed by the Great Western Mining company of California, with offices at Cedar Rapids, Ia., against the estate of Peter L. Kimberly, who died at Chicago last Sunday, is a blackmailing scheme, is the opinion in local mining circles, where Mr. Kim-berly's good work in the development of many large properties is well known. While the plaintiff company charges

berly's good work in the development of many large properties is well known. While the plaintiff company charges that Kimberly, aided by some of his Sait Lake associated so to it for \$2,000,000 property worth not more than \$299,000, it is stated positively by officials of the Western Exploration company, of which Mr. Kimberly was an officer and a heavy shareholder, that he news at any time received a dollar from the Great Western Gold Mining company, or from any one connected with the concern.

Investigation develops the fact that the promoters of this company had at one time an option of the now famous Balakialla copper mines of Shasta county, Cal., now being developed by the company of which Mr. Kimberly was one of the heaviest backers, but that they were turned down on Mr. Kimberly advice because he believed them to be not financially responsible.

Mr. Kimberly was a bold and successful mining operator, who was ever ready to "take a charce," but that in any of his dealings he was guilty of sharp or questionable practices is not believed for a moment by the men with whom he has for years been associated.

Willard F. Snyder of this city, who is also made a party to the suit, as an associate of Mr. Kimberly's in the alleged deal, is now in the East, leaving here immediately upon the receipt of the news of Mr. Kimberly's death.

Gold Blossom Shut-Down.

Gold Blossom Shut-Down. Special to The Tribune.

Special to The Tribune.

AMERICAN FORK, June 5.—The Gold Bloasem mine, located in the North Tintic district and cwned by local mining men, has closed down, Just when on the verge of commencing ore shipping, seems very singular. However, when seen yesterday, R. E. Hunter of the Capital Gold and Silver Mining company, which owns that property, stated that the shut-down was due entirely to the scarcity of water in that section, the transporting of which by improvised means was very expensive. It is the intention to wait until fall, when there will be plenty of water. The company now has about 400 tons of ore which is available for shipping.

Dr. W. J. Holden and son, Harry W. Holden, of Cleveland, O., arrived here last evening to spend the summer. Dr. Holden is one of the main owners of the Dutchman mine, located in American Fork canyon. It is understood that he will resume operations on that property. He was here the greaten part of hast summer and conducted development work on the old mine, cleaning down in early fall. He left this morning for Sali Lake City, and on his return more definits information will be obtained.

Shipment From Mammeth. Six cars of ore from the Mammoth of Tintle Six cars of ore from the Mammoth of Tintic which were recalived at the sampler during the day will add a handsome sum to the company's treasury. In the consignment there are 200 tons, one-third of which according to assays, carries values of 416 gold, 34 silver one-third figures up 54 gold, 38 silver and 10 per cent lead, while the remainder of the alignment shows 310 gold and 34.59 silver. The autput from the property is being steadily increased and the prospects for a prosperous season are bright.

THE DAY ON 'CHANGE

Several Stocks Show Weakness, but Trading Is Fairly Active.

For 20,000 shares of stock, buyers on the minipg exchange yesterday checked out the sum of \$4115.50, with the market gencrally manifesting a tone less firm, although Yankee Con, proved a notable exception, 100 shares of the stock going on the morning call at 384c, while later in the day an order for 500 could not be filled at less than 39% c.

May Day was the most active of the traders, 10,800 shares passing over the counter before the close of the day's business, the prices ranging from 131/20 down to 12c, many of the lots going on the seller's option ten to thirty days.

Carisa, which opened at 20c, was de-Carisa, which opened at 20c, was decidedly off, being marked down to 18c on the afternoon call, but on the open board placed 500 at 19½c, while Silver Shield lost seven points from its opening sale at 25c, with only 1500 shares changing hands. New York Bonanza masketed 400 at 57½c, while later in the day an offering at 50½c found no takers, and Uncle Sam Con. glided from 37½c to 36½c on small sales. Tetro moved up one notch, placing 1500 at from 17½ to 18. Ajax disposed of one lot at 16½c. 100 Manmoth found a buyer at \$1.25 and 10½o was the best that could be secured

Fourteen Claims Bought by Scallon

Faith in Bonanze Mountain Shown by Noted Mining Engineer-Humanity Side to Gold Camps.

BY STAFF CORRESPONDENT.

GOLDFIELD, June 8.-The announce ment that William Scallon has purchased fourteen claims joining the Gibraltar Mines Syndicate property is the answer to a question that all Goldfield has been

to a question that all Goldfield has been walting for rather impatiently. Mr. Scallon was at one time the president of the Anaconda, also Western representative of Amalgamated.

Whenever a person prominent in the mining or financial circles of the country comes to Goldfield he is eagerly sought for an opinion on the country. Mr. Scallon, on account of his prominence and influence, became the especial target for the representatives of the press as well as business men in general. To all inquirers he would simply smile, and answering, would tell nothing the listener longed to hear.

To a friend in Goldfield some days ago Mr. Scallon, ventured the remark that he intended to return to Bullfrog, where he had already spent two weeks looking over the various properties.

The purchase just announced shows that Mr. Scallon can think and act without taking the public into his confidence. It also proves how analous capital is to secure a portion of the famous Bonanza mountain.

mountain.

The Builfrog Golden Scepter Mining company has been organized to absorb the purchase.

the purchase.

One of the pathetic incidents of mining life in Goldfield is the occasional funeral of unfortunates whose search for wealth ends in death away from home or friends.

Following the hearse there usually marches newly-made friends, or members of the various fraternal organizations represented in the camp.

One good feature of the country and life here is the prevailing desire on the part of all to administer to the comfort of unfortunate ones.

The cemetery of Goldfield is not large. The death rate is exceedingly small in proportion to the population. Each grave is carefully marked, thus assuring positive identification in case relatives would desire the removal of hodies for home burial, and not a grave has been neglected. Visitors generally find an abundance of desert flowers near at hand, and on Memorial day the grave of friend and stranger was banked with flowers, in the midst of which a small American flag was holsted.

BINGHAM IS FAVORED.

Mr. Alexander Says Investors Are Much Pleased With Camp.

Returning yesterday from an extended Eastern trip, Mr. W. H. Alexander was again at his desk to take up the considagain at his desk to take up the consideration of his numerous. Utah investments. While conditions generally are somewhat quiet throughout New England financial circles, says Mr. Alexander, the leading camps of Utah are at the present time regarded with more favor by investors than those of other Western States. He found many queries as to the operations of Mr. Newhouse and his associates in Bingham, and also in Beaver county, and declared that the former camp was at present the chief center of interest among investors.

WILL SINK DEEP.

Lower Mammoth Prepares to Tap New Levels.

Lower Mammoth of Tintic has reached the 1000 level, and is being rushed so rapidly that with the week it is anticipated that the improvement will be carried down to the 1400, after which sinking will be at once resumed.

will be at once resumed.

Recent development work in the pronerty points to the fact that the values
will be well maintained with depth, and
the management is confident that even
when the ground is opened up down to
the 1800, the ore bodies will show an improvement, both in size and value.

Boston Stocks

James A Pollock & Co. say of the Boston market. "There was nothing new in the local market Opening prices were quiet and fairly strong, but later losses were registered on profit-taking by the traders. There were ab-solutely no features."

Inte advices from Co	CHECKER	and a contract of	and a

Late advices from Goldfield report that a small force is at work on the Goldfield-Guerdon properties with satisfactory results, although no sensational values have as yet been uncovered. Arrangements have been completed for the chening up of the Bay Horse group, adjoining the Guerdon, while fit the Thompson & Quinn property, ising immediately to the south, ore carrying \$52 gold is, it is announced, being extracted in considerable quantities.

Strike in Amy.

Writing from Goldfield to Holders Child & Cole, Judge U. V. Withou of Ogden, who is operating extensively at Kawich, says that a rich streak of gold-bearing rock is being opened up on the Amy claim of the Kawich-Bullfrog Mines company, between Rhyolite and Indian Springs. He reports assays showing values of more than \$2000 per ton and rich pannings taken from a width of better than three feet. He believes that the company will soon have the property in the salpping class.

Uncle Sam Dividend.

A dividend of 15000, I cent per share, to stockbolders of the Uncle Sam Con. of Tintic was declared yesterday afternoon at the meeting of the board of directors. The newly elected board, which was also the old board, reorganized by electing all of the old officers to the positions they have held during the year. The dividend declared is payable on the 24th Inst. Ecoks will close on the 17th and will be reopened on the 75th.

Ore and Bullion.

Ore and buillon settlements during the day amounted to \$76,900, McCornick & Co. reporting them as they follow. Gold, sliver, lead and copper ores, \$40,000, base buillon, \$57,900. In the metal market sliver ruled at \$558, cents an ounce, copper was unchanged at 14%, cents, and lead was stationary at \$3,50@4.50 per cent.

WITH A GOOD

Extracting Wealth From Ruby River

Head of the Conray Placer Mines Spends a Day in Salt Lake City.

In the city during the day for a few ours was Mr. A. Bradberry, head of the Conray Placer Mining company, operating on the Ruby river in the Ruby mining district of Montana. Mr. Bradberry has two dredges at work now, which are handling nearly 2000 cubic yards of gravel per day, and is engaged in the installation of another machine of much larger capacity. As to the values saved, the operator pleaded that his company being a close corporation, he did not believe it advisable to give out figures, but admitted that the results were in every way satisfactory to the stockholders.

Mr. Bradberry regretted that, being already due at his home in Lawrence, Mass. to attend to pressing business, he did not have time to spend a few days in the examination of Utah's camps, particularly Bingham, which he declares is regarded with high favor by investors of his section. mining district of Montana. Mr. Brad-

New Company Formed.

The Mountain View Mining and Milling company filed articles of incorporation with the County Clerk yesterday. The incorporators are Timethy D. Suilivan, Patrick Shea, James P. Driscoll of Eureka, Patrick Ryan and Fred T. McGurrin of Salt Lake The capital stock is fixed at \$150,000, in shares of \$1 each. The corporation is the successor of a similar corporation formed in Jush county and owns properties in the Tintic district.

Makes Final Payment.

The final payment on the Nighthawk group at Builfrog which was purchased by Cincinnati investors was made yesterday through Broker W. H. Tibbals. The total consideration was in the neighborhood of \$10.00. Mr. Tibbals also announced that the first payment on the Chio Girl claims of Goldfield which are being handled by a New York syndicate, would be received by him today for transmission to the former owners.

Cuban Diarrhoea.

U. S. soldiers who served in Cuba during the Spanish war know what this disease is, and that ordinary remedies have little more effect than so much water. Cuban diarrhoea is almost as severe and dangerous as a mild attack of cholera. There is one remedy, however, that can always be depended upon, as will be seen by the following certificate from Mrs. Minnie Jacobs of Houston, Texas: "I hereby certify that Chamberlain's Colle, Cholera and Diarrhoen Remedy cured my husband of a severe attack of Cuban diarrhoea, which he brought home from Cuba. We had several doctors. but they did him no good. One bottle of this remedy cured him, as our neighbors will testify. I thank God for so valuable a medicine," For sale by all leading druggists.
